DETAILED ACTION

This office action is response to applicant's Response to Election/Restriction field on 01/12/2007. The applicant's selected claims 18-22, 26-27 and 66-71.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- Claims 18-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Pirkola et al. (Patent No. 6,611,516).

Consider **claim 18**. Pirkola teaches a device for use in a cellular network comprising means for completing an incoming call to a wireless cell phone via the cellular network if the cell phone is not roaming and means for forwarding the incoming call to a packet switched data network if the cell phone is roaming to an area covered by an IP network (Abstract, C4, L10-34, C7, L10-34, Fig.2, Illustrate gateway function 210 as read on a device wherein provides wireless cell phone completed call if in roaming in either PSTN or MIPTN/(IP network)).

Application/Control Number: 10/614,138

Art Unit: 2617

Consider **claims 19, 21**. Pirkola teaches the device of claim 18 wherein the packet switched data network is the Internet (C6, L29-67, C7, 60-67, C8, L1-10, Fig.2, Illustrate and described).

Consider **claim 20**. Pirkola teaches the device of claim 18 further including a switch/server to receive signals indicating whether the cell phone is roaming (C7, L20-34, Fig.2.Illustrate Gateway Function 210 indicating whether the cell phone is roaming).

Consider **claim 22**. Pirkola teaches the device of claim 20 wherein the signals are received using out of band signaling (C7, L20-34, 60-67, C8, L1-10, Fig.2, Illustrate Gateway Function 210 indicated subscriber roaming out of band).

3. Claims 26-27, 66-71 are rejected under 35 U.S.C. 102(e) as being anticipated by Baumeister et al. (Patent No. 6,914,972).

Consider claims 26, 66, 69. Baumeister teaches an adapter comprising an IP interface having an IP address, a telephone interface for connecting to a phone having a telephone number, and software for forwarding incoming data from an IP network to said telephone by converting said incoming IP signals to telephony signals such that said telephone receives an incoming telephone call (Abstract, C3, L6-17, L30-57, Fig.1, Illustrate internet telephone adapter ITA which read on adapter wherein contain base unit that have software for forwarding incoming data from an IP network to said telephone).

Application/Control Number: 10/614,138

Art Unit: 2617

Consider **claim 27**, **67**, **68**. Baumeister teaches the adaptor of claim 26 wherein said adapter is integrated within said telephone (C3, L7-17, Fig.1, Illustrate and described).

Consider **claim 70**. Baumeister teaches the adapter of claim 69 further comprising an additional protocol translator for translating between a protocol utilized by a cellular network and a protocol utilized by an IP network (C3, L10-17, Fig.1, teach SP 2 as read on translating that set up link between a protocol utilized by a cellular network and a protocol utilized by an IP network).

Consider **claim 71**. Baumeister teaches the adapter of claim 70 further comprising software for automatically selecting between plural network interfaces (C7, L60-67).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiet Doan whose telephone number is 571-272-7863. The examiner can normally be reached on 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph H. Feild can be reached on 571-272-4090. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
